

# IntraPac Plastic Jars

IntraPac plastic jars have multiple applications. For health and beauty aid products, these jars are an excellent choice as they can be manufactured with short lead times and are suitable for many decoration possibilities. These include four color offset printing and multicolor silk-screening, which use UV inks; high-speed pressure sensitive full wrap and the spot labeling on front and back; and high speed pressure sensitive labeling of the jar bottom and closure top.

IntraPac's jars will enhance your products' visibility and present new marketing opportunities for them.

## Jar Structure

Jars have a nomenclature, like many products, all their own. When ordering a jar, refer to and know the following key parts.

### GLOSSARY

SBSW	Straight Base Single Wall
HWSW	Heavy Wall Single Wall
LPHSW	Low Profile Heavy Single Wall
SBDW	Straight Base Double Wall
RBDW	Radius Base Double Wall
Textured	In Mold Frosted Surface
Outer/Inner	Refers to the two pieces manufactured to make a double wall jar. May be made in different materials.

### MATERIAL CODES

PP	Polypropylene
PS	Polystyrene
SAN	Styrene Acrylonitrile

Keep in mind when requesting quotations, the following facts help us serve you better:

1. Size
2. Style
3. Neck Size
4. Material and Color
5. Decoration, if any
6. Special Features, if any
7. Quantity
8. Delivery Desired
