

IntraPac Jar Closures

IntraPac plastic closures have multiple applications. For many markets, whether used with an IntraPac plastic jar or with any other manufacturers' packages, these closures are an excellent choice. These closures are available with various lining materials, including heat induction foil, pressure sensitive foam or pulp. IntraPac utilizes high speed lining equipment which provides short lead times. Cap decorating is also available, whether spot applied pressure sensitive labeling or one color silk-screening to enhance your product.

Jar Closure Structure

Jars closures have a nomenclature, like many products, all their own. When ordering a jar closure, refer to and know the following key parts.

GLOSSARY

H	Smooth Straight Sided Closure
HT	High Top Smooth Straight Sided Closure
R	Rib Sided Smooth Top Closure
RC	Domed Smooth Closure
RCT	Textured Domed Closure
Textured	In Mold Frosted Surface
TE	Tamper Evident Protection

MATERIAL CODES

PP	Polypropylene
LDPE	Low Density Polyethylene
